C. INSTRUCTIONS

Any organization conducting excavation of soils, drilling, probing or any other work disturbing below grade material must first obtain a signed permit authorizing the work. This application form must be completed and submitted to the PDA Director of Engineering. The application must include a plan of the work area either sketched in the space provided or attached separately. If a separate sheet is attached, duplicate copies must be submitted. The applicant must also stake out or otherwise mark the work area. When all required clearances have been obtained, the PDA will notify the applicant. The applicant is responsible for compliance with any remarks listed in the clearance review section. This approved form must be in the possession of the operator performing the excavation. If it is anticipated that work will extend past the termination date Dig Safe must be notified within 5 days before the actual date of termination, at 1-888-Dig Safe. If Dig Safe is not notified the permit will be voided and a new application will need to be submitted before work can resume.
